R01-21-A-030

1. Applicant Identification – Berkshire Regional Planning Commission
2. Funding Requested
 - a. Assessment Grant Type: Community-wide Assessment
 - b. Federal Funds Requested
 - i. \$300,000
 - ii. Not requesting a Site-specific Assessment Grant waiver of the \$200,000 limit.
3. Location
 - a. Town: Pittsfield
 - b. County: Berkshire
 - c. State: Massachusetts
4. Property Information for Site-Specific Applications: N/A
5. Contacts

<ol style="list-style-type: none"> a. <u>Project Director</u> Melissa Provencher Phone (413) 442-1521 ext. 22 mprovencher@berkshireplanning.org 1 Fenn Street, Suite 201 Pittsfield, MA 01201 	<ol style="list-style-type: none"> b. <u>Chief Executive</u> Thomas Matuszko, Executive Director Phone (413) 442-1521 ext. 34 tmatuszko@berkshireplanning.org 1 Fenn Street, Suite 201 Pittsfield, MA 01201
---	---
6. Population – 42,533 (City of Pittsfield/Target Area)
7. Other Factors Checklist

Other Factors	Page #
Community population is 10,000 or less.	
The applicant is, or will assist, a federally recognized Indian tribe or United States territory.	
The priority brownfield site(s) is impacted by mine-scarred land.	
The priority site(s) is adjacent to a body of water (i.e., the border of the priority site(s) is contiguous or partially contiguous to the body of water, or would be contiguous or partially contiguous with a body of water but for a street, road, or other public thoroughfare separating them).	1 & 2
The priority site(s) is in a federally designated flood plain.	2
The reuse of the priority site(s) will facilitate renewable energy from wind, solar, or geothermal energy; or will incorporate energy efficiency measures.	3
30% or more of the overall project budget will be spent on eligible reuse planning activities for priority brownfield site(s) within the target area.	9

8. Letter from the State or Tribal Environmental Authority
A current letter from the appropriate state or tribal environmental authority acknowledging that the applicant plans to conduct assessment and cleanup activities and is planning to apply for FY21 federal brownfields grant funds is attached.

Subject: **STATE LETTER OF ACKNOWLEDGMENT**
Berkshire Regional Planning Commission, Application for EPA Assessment Grant Funds

Dear Mr. Gardner:

MassDEP is pleased to support the proposal submitted by the Berkshire Regional Planning Commission (BRPC) under the Fiscal Year 2021 U.S. Environmental Protection Agency (EPA) Brownfield Assessment Grant Program. If awarded, BRPC intends to use the funding to assess various properties that include dry cleaners, former paper mills, former gasoline station, etc. The redevelopment of these sites is expected to improve the adjacent neighborhoods, resulting in higher property values, and create jobs and/or housing within these neighborhoods thereby enhancing the tax base. The potential for greenspace and not-for-profit activities can also be anticipated to result from this project.

In Massachusetts, state and federal agencies have developed strong partnerships and work together to ensure that parties undertaking Brownfield projects have access to available incentives. Massachusetts Department of Environmental Protection (MassDEP), through our regional officers, provides technical support to Brownfield project proponents when regulatory issues arise. If this proposal is selected, MassDEP will work with our state and federal partners to help **BRPC** make this project a success.

I hope that this information is helpful, and please feel free to contact Angela Gallagher at (508) 946-2790 if you have any questions or concerns.

Sincerely,

Paul Locke, Assistant Commissioner
Bureau of Waste Site Cleanup

ec: Melissa Provencher, Brownfields Program Coordinator, BRPC
Caprice Shaw, Brownfields Coordinator, BWSC-WERO

This information is available in alternate format. Contact Michelle Waters-Ekanem, Director of Diversity/Civil Rights at 617-292-5751.

RANKING CRITERIA FOR MULTIPURPOSE GRANTS

1. PROJECT AREA DESCRIPTION AND PLANS FOR REVITALIZATION

1.a. **Target Area and Brownfields**

1.a.i. Background and Description of Target Area

Berkshire County is the westernmost county in Massachusetts encompassing an area of approximately 945 square miles with a current population estimated at 124,944 persons. Much of the county was built along the Housatonic River. Flowing through a historically rural area, the Housatonic River attracted increased industrialization in the late 19th century. The City of Pittsfield is the largest city and the historic county seat of Berkshire County and is the Target Area for this Community-wide Assessment. At the confluence of the Housatonic River, the City of Pittsfield's landscape was once dotted with mills that produced lumber, grist, paper and textiles. In 1890, William Stanley, Jr. founded the Stanley Electric Manufacturing Company in Pittsfield. The company manufactured small transformers, electrical motors and appliances. In 1903, General Electric (GE) acquired Stanley Electric and subsequently operated three major manufacturing operations in Pittsfield: transformer, ordnance and plastics. Due to the success of GE, Pittsfield's population boomed in the 1930s. However, significant layoffs began in the 1980s, bringing an economic and population decline from which the City has yet to recover.

The City now struggles with known and suspected Brownfields in the Target Area including former textile mills and paper mills, auto shops, fueling stations and dry cleaners - among others. Many of these sites are contaminated with chlorinated solvents, petroleum products, PCBs, asbestos and heavy metals. The impacts of these languishing sites with known or unknown contamination continue to cripple the area with unknown health and safety risks and a stigmatized economy that is decreasing job opportunities and losing tax revenues.

1.a.ii. Description of Priority Brownfields Sites

The Berkshire Regional Planning Commission (BRPC) has already identified four prominent sites within the Target Area, including a long vacant former factory and site of a three-alarm fire (JB Paper), an abandoned auto retailer that included a garage and maintenance and repair facility (Arace site) and two former mills on opposite sides of the Housatonic River (50 East Mill Street and Harris Street). These sites are in densely developed neighborhoods and are among some of the poorest communities within the region.

JB Paper: This site has remained vacant for 10 years. A suspicious fire in the building in 2016 resulted in greater concerns regarding public safety, as well as soil and groundwater contamination. The site is located adjacent to an affordable housing complex owned by the Pittsfield Housing Authority (PHA). Three other affordable housing complexes are within ¼ mile of this site. Four parks and 1 school are within ½ mile of the site. In the surrounding area, 33% of people are unemployed and 65.1% of families are living in poverty. The community is also a minority community with 38.1% reporting as non-white in a city that is just 16.1% minority.¹

¹2014-2018 American Community Survey

Known and suspected environmental concerns include exposure to potential asbestos resulting in respiratory complications and cancer for the residents adjacent to the site.

Harris Street: This site previously housed an autobody repair shop, demolished by the City in 2002 due to unsafe building conditions and abandonment, and was historically the site of a wool mill. The site is adjacent to the Housatonic River and located partially within the 100-year floodplain. Known and suspected contaminants include petroleum, heavy metals and pesticides. Exposure to chlorinated solvents, petroleum-contaminated air, heavy metals and PCBs pose a risk to the community directly adjacent to and surrounding the Harris Street. Such exposure may result in many adverse effects including reproductive impairment, multiple organ damage, nervous system damage, respirator complications, and cancer.

50 East Mill Street: Dating back to the late 1800s, this site has a rich history including a textile and wool mill (formerly connected to the Harris Street site across the Housatonic River), autobody garage and repair, salvage yard, scrap metal reclamation, trucking and furniture refinishing. Remaining vacant for nearly 30 years, barriers to redevelopment have been mitigated over the years including demolishing the fire-damaged mill building and removing the building debris in 2008 and restoring the riverbank adjacent to the site. Exposure to chlorinated solvents, petroleum-contaminated air, heavy metals and PCBs pose a risk to the community directly adjacent to and surrounding the 50 East Mill site. Such exposure may result in many adverse effects including reproductive impairment, multiple organ damage, nervous system damage, respirator complications, and cancer.

Arace site: Once the site of a car dealership, garage, maintenance and repair facility, the site now lies abandoned and neglected for nearly 30 years. Fear of contamination from petroleum and other contaminants including heavy metals and asbestos, have deterred development on this 10-acre property. Exposure to chlorinated solvents, petroleum-contaminated air, and heavy metals pose a risk to the community directly adjacent to and surrounding the site. Such exposure may result in many adverse effects including reproductive impairment, multiple organ damage, nervous system damage, respirator complications, and cancer.

1.b. Revitalization of the Target Area

1.b.i. Reuse Strategy and Alignment with Revitalization Plans

This project aligns with the Sustainable Berkshires Plan (Plan), which was developed by BRPC through a 2010 HUD Sustainable Communities Regional Planning Grant. The Plan was developed around the HUD-DOT-EPA Livability Principles. A Policy of the Plan is to “Remove or minimize threats to health posed by environmental contamination and brownfield sites.” This project is consistent with the economic goals within the Plan including making sites development ready by proactively addressing brownfield concerns. The Target Area is the most industrialized community within Berkshire County, where redevelopment can use existing infrastructure, including water, sewer and transportation, consistent with the Sustainable Berkshires strategy to “prioritize brownfield sites within urban and suburban neighborhoods for cleanup and reuse.” In addition, the Brownfields Program has been identified within the Comprehensive Economic Development Strategy as one of the “Projects Representing the Greatest Needs Regionally.”

The JB Paper site has high development potential and the redevelopment of this site is a high priority for the City. The City is poised to take ownership of the site in tax title, and envisions the site as a future home for commercial office space resulting in job creation and/or a home for community services. The City is also poised to take both the Harris Street and 50 East Mill Street sites through tax title foreclosure and envisions the 50 East Mill Street site as a future home for commercial office or light industrial space. Nestled within a residential neighborhood abutting the Housatonic River, the Harris Street site is poised for potential multifamily redevelopment, or potential greenspace to contribute to the ongoing development of the *West Side Riverway*, which seeks to provide greater access to the Housatonic River for residents and visitors. Lastly, the City has taken control of the Arace site through the tax title taking process. This site is prime for commercial development along Route 20, the gateway to Pittsfield. The reuse of all of these sites have the potential to facilitate renewable energy, while any building will conform to the Commonwealth's Stretch Code for green building and incorporate energy efficiency measures.

1.b.ii. Outcomes and Benefits of Reuse Strategy

This project comes early in the reuse planning process; however, the potential economic benefits envisioned for the region include: job creation, increased property values, and enhanced tax base. This project will continue to remove the uncertainties associated with industrial and commercial sites that have the highest potential for redevelopment. The redevelopment of these sites is expected to improve the adjacent neighborhoods (including two adjacent Opportunity Zones), resulting in higher property values, creating housing within these neighborhoods, and creating jobs for both the residents of these neighborhoods and the adjacent Opportunity Zones.

One example is the former Arace site on West Housatonic Street. This former auto retail lot holds significant economic development potential. However, unknown contamination has hampered redevelopment and the City has taken control of the property through the tax title taking process. The JB Paper Factory site is a prime location for new development on an industrial site with great potential to aid in the revitalization of a low income neighborhood. The City of Pittsfield is designated as a Green Community; therefore, any new development will comply with the stretch for sustainable design. While the City of Pittsfield largely relies on property taxes since state aid has decreased, significant benefits will not be limited to putting these properties back on active tax rolls. Additional greenway benefits are expected through the potential of the Harris Street site to contribute to the ongoing development of the *West Side Riverway*, a linear riverfront park years in the making that provides access to the Housatonic River for passive recreation.

1.c. **Strategy for Leveraging Resources**

1.c.i. Resources Needed for Site Reuse

BRPC and the City will continue to actively seek a variety of funding sources and incentives to help remediate brownfields and bring them back into productive use. The City of Pittsfield is a CDBG entitlement community and will use these funds toward activities such as demolition and redevelopment of sites. BRPC has begun working with federal, state and local agencies to bridge funding gaps. Potential key funding resources that will be sought include HUD, EDA, MassWorks and USDA Rural Development.

An example of past success resulting from assessment conducted under BRPC's program is *GreylockWORKS* in North Adams, Massachusetts, which has leveraged over \$5M in private investment along with grant funds exceeding \$4.5M from 12 different programs and 7 different agencies, including the MassDevelopment Brownfield Program, USDA Agricultural Marketing Service, USDA Rural Business Development, MassWorks Infrastructure Program and the MassDevelopment Collaborative Workspace and Site Readiness Programs.

1.c.ii. Use of Existing Infrastructure

The Target Area for this project is the largest, most industrialized and most densely developed community within Berkshire County where redevelopment can use existing infrastructure, including water, sewer and transportation. There are no additional infrastructure needs key to the revitalization plans for the priority sites.

2. COMMUNITY NEED & COMMUNITY ENGAGEMENT

2.a. Community Need

2.a.i. The Community's Need for Funding

The communities within Berkshire County, including the City of Pittsfield, do not have the financial resources to address all their brownfield issues. Municipalities in Massachusetts depend heavily on local aid from the state and local property taxes. With local aid decreased, communities in Berkshire County must either raise property taxes or cut services. However, Proposition 2½ MGL Ch. 59 § 21 is a state statute that limits property tax increases by municipalities to 2.5% or less. A side effect of Proposition 2½ is that municipal incomes decline in real terms whenever inflation rises above 2.5%, thus resulting in a real local tax decline.

With no county government, the communities rely heavily on BRPC to provide services. BRPC is a state-created regional planning agency that serves all 32 cities and towns in Berkshire County. However, BRPC relies heavily upon funding through competitive grants, which make up approximately 70% of our annual operating budget. BRPC does receive funding from each of our member communities, but these funds make up just 3% of our annual budget. In addition, BRPC is charged with meeting federal requirements to service the transportation needs of our communities - this funding makes up just 17% of our annual budget. Additional funding is needed to address known and suspected Brownfields and BRPC is unable to draw from other funding sources.

2.a.ii. Threats to Sensitive Populations

(1) Health or Welfare of Sensitive Populations: This assessment grant will facilitate the identification and reduction of threats to the health and welfare of sensitive populations. Risk factors for poor health include poverty, minority groups, living in an urban setting, female gender, family history, and environmental exposures – all of which apply within the Target Area.

No health data exists at the city level for any of the communities within Berkshire County, including the City of Pittsfield - the Target Area. The only available health data is through the Massachusetts Community Health Information Profile, which maintains county-level data to assess health needs, monitor health status indicators, and evaluate health programs. Assessments are needed to determine whether, and to what degree, the public health is

impacted by possible exposure to harmful contaminants within the Target Area. Exposure to chlorinated solvents, petroleum-contaminated air, heavy metals and PCBs pose a risk to the communities directly adjacent to and surrounding 50 East Mill Street, Harris Street and Arace site. Such exposure may result in many adverse effects including reproductive impairment, multiple organ damage, nervous system damage, respirator complications, and cancer. Known and suspected environmental concerns include exposure to potential asbestos for the residents adjacent to the JB Paper site resulting in respiratory complications and cancer. This grant will address the identification and reduction of threats to public health and welfare. Addressing these sites will provide significant health benefits including reduced environmental exposures from the remediation and abatement of contamination for sensitive populations.

All four priority sites within the Target Area have been vacant or abandoned for 10 to 30 years, and all are in the midst of neighborhoods, community centers, parks and schools. These sites have often been host to squatters, vandalism, illegal dumping and other criminal activity. A suspicious fire leveled the JB Paper Factory in August 2016. The City was aware of concerns that squatters were using the space and building officials were concerned about its dilapidated condition. However, no action had been taken due to the potential contamination on site. The damage caused by the fire has resulted in greater concerns with regard to public safety, asbestos and soil and groundwater contamination. The abandoned and derelict structure, open foundation and debris pose threats to the welfare of the residents who live in the neighborhood, particularly the adjacent affordable housing complex. According to a Berkshire United Way study, people are concerned about the diminishing quality of life in their neighborhoods and sense a loss of spirit and cohesiveness. Addressing these sites will provide significant benefits for the welfare of sensitive populations including minorities, children and women by eliminating the threats posed by abandoned and derelict structures and redeveloping those properties to provide better paying jobs and better/safer housing opportunities thereby reducing poverty.

(2) Greater Than Normal Incidence of Disease and Adverse Health Conditions:

Sensitive populations include minorities, elderly, children, and women of child-bearing age. Over half the population of the County is composed of individuals who are among sensitive populations. The County has the second highest percentage (20.2%) of persons over 65 years in the state, a trend which is expected to continue. Working class families and people of color face a “triple unequal exposure effect”² to toxic pollution and other environmental hazards in comparison with higher-income residents. According to the Massachusetts Community Health Information Profile, breast cancer incidence in the region is disproportionately higher than in the state for minority women with a rate of 178 versus 123 for black women, 223 versus 81 for Asian women and 172 versus 72 for Hispanic women. The incidence of bronchus and lung cancer in Black non-Hispanic men in the region is significantly higher (146.5) than that of the State (89.2).

Through this project, assessments will be conducted to better understand the risks posed by these sites, institutional and engineering controls will be implemented as needed, and the process to sever the pathways of contamination will begin. Risk Assessments will be conducted to ensure that no threats are posed to sensitive receptors, including exposure to potential

² Unequal Exposure to Ecological Hazards (Faber and Krieg, 2005)

asbestos resulting in respiratory complications and cancer for the affordable housing complex adjacent to the JB Paper site, exposure to chlorinated or petroleum-contaminated air, heavy metals, and PCBs resulting in many adverse effects including reproductive impairment, multiple organ damage, nervous system damage, respirator complications and cancer for the community adjacent to and surrounding the 50 East Mill and Harris Street sites and the Arace site. A plan will be developed to eliminate the direct contact exposure risk to contaminated building materials, soil, and groundwater and eliminate the risk of breathing in potentially contaminated air.

(3) Disproportionately Impacted Populations:

In addition to the presence of brownfield sites discussed earlier, the Target Area is impacted by other various cumulative environmental issues. Power plants, incinerators, industry, landfills, congested highways, and other sources of air, water, and land pollution are all present within the Target Area. The Target Area also faces environmental justice concerns being overburdened from existing sources of pollution present. The GE/Housatonic River Cleanup Site in Berkshire County is one of the largest PCB cleanup projects in the U.S. and has direct impacts within the Target Area. For a period of 40 years, GE discharged untold quantities of PCBs into the Housatonic River from its plant in Pittsfield. Since that time, PCBs have been carried downstream accumulating in the sediment behind mill dams, oxbows and other slow-moving sections of the river. The City is deeply impacted by the contamination within the river, which flows through its downtown neighborhoods. A permanent PCB landfill (Hill 78) already exists in Pittsfield holding contaminated river sediment adjacent to an elementary school. The air quality of the school continues to be monitored due to the impacts of Hill 78.

This grant will facilitate the identification and reduction of threats posed by Brownfields sites within the Target Area and begin bringing these sites back into productive use. Site assessments are ultimately expected to result in increased property values, improved environmental conditions and job creation.

2.b. Community Engagement

2.b.i. Project Involvement & 2.b.ii. Project Roles

We are fortunate that Berkshire County is small enough that organizations across a wide variety of venues tend to know each other and work together constantly, often at a very personal level. The following community-based organizations have committed to providing support to the Berkshire Brownfields program:

- **1Berkshires:** The economic development organization, marketing the region to create jobs and a sound local economy, will participate on the Steering Committee, help identify potential sites, publicize the program, host presentations and work with property owners.
- **Pittsfield Housing Authority (PHA):** The PHA was established to provide the community with fair, equal housing opportunities. PHA owns and administers public housing for over 200 families and more than 400 individual tenants. PHA owns an affordable housing complex adjacent to the former JB Paper site and will post virtual public meetings and highlight the project's progress on their website.
- **Berkshire Environmental Action Team (BEAT):** The mission of BEAT is to work to protect the environment for wildlife in support of the natural systems that support us all. BEAT supports

The Berkshire Regional Planning Commission, Berkshire County Massachusetts

efforts to move sites through assessments for cleanup and redevelopment, keeping development in appropriate areas and sparing wildlife habitat on undeveloped land. BEAT will assist in identifying sites, publicize the program through their e-newsletter and website and communicate with stakeholders.

2.b.iii. Incorporating Community Input

BRPC will use a five-step approach that consists of soliciting, collecting, considering, responding to and incorporating community input. BRPC will offer alternatives to in-person community engagement in the event of social distancing or other restrictions due to COVID-19. BRPC has partnered with the PHA to ensure that residents adjacent to the JB Paper Company are informed of the project. Information will be made readily available via the City's website and social media. It is anticipated that we will conduct a minimum of three virtual meetings with residents: at the project outset, upon completion of a Phase II ESA, and during the Remedial Action and Reuse Plan development.

BRPC will communicate project progress to citizens and interested groups and solicit comments through a variety of media and community outreach venues, including:

- Websites and Social Media – BRPC and its partners will use Facebook and other websites.
- News Outlets – A minimum of three articles in regional print and online newspapers.
- Steering Committee Meetings – ±18 virtual meetings; all meetings will be public and posted in accordance with MA General Law (MGL).
- Virtual Neighborhood Public Meetings – Virtual meetings will be held within the affected neighborhoods in the evening to accommodate the working public.

3. TASK DESCRIPTIONS, COST ESTIMATES, AND MEASURING PROGRESS

3.a. Description of Tasks/Activities & Outputs

Task 1: Cooperative Agreement Oversight:	
i. Project Implementation	BRPC will continue to provide support to the Steering Committee that is already in place. The Steering Committee consists of elected and appointed officials, residents and interested citizens, business leaders, community development corporation members and an EPA Region I representative. A member of the BRPC staff will attend the EPA Brownfields Conference. Regular updates to the Assessment, Cleanup and Redevelopment Exchange System (ACRES) database will be used to measure results and progress of the project. Required quarterly reports will be submitted. BRPC will oversee the selected consultant, ensure compliance with applicable federal cross-cutting measures, and work closely with EPA Region 1 staff. BRPC will work with the Steering Committee to hire a QEP to conduct 2 to 6 Phase I ESAs, 4 to 6 Phase II ESAs, and 3 to 4 Remedial Action and Reuse Plans. BRPC will follow all state and federal procurement regulations. The budget for this task is \$19,894.
ii. Anticipated Project Schedule:	10/1/21 – 9/30/24
iii. Task/Activity Lead(s):	Project Manager
iv. Output(s):	<ul style="list-style-type: none"> • RFP/RFQ; documentation of meeting of open competition; contract for scope of services. • Performance evaluation reports, and applicable corrective actions.

<ul style="list-style-type: none"> Quarterly reports and other forms; updated ACRES database; final report, and closeout forms. “Success Story” fact sheets. Attend EPA Brownfields conference.
Task 2: Site Inventory, Evaluation & Prioritization
<p>i. Project Implementation</p> <p>BRPC will conduct community outreach within the Target Area and the various local, regional, and state economic development organizations serving the region to request site nominations. Nomination forms will be posted on BRPC’s website. All sites nominated will be entered into a Microsoft Access database, including such information as ownership, address, acreage, etc. Nominated sites will first be reviewed based on whether site access has been obtained and secured. Nominated sites will then be presented to the Steering Committee for consideration and evaluation. The Steering Committee will review, rank and prioritize sites. The budget for this task is \$9,360.</p>
ii. Anticipated Project Schedule: 10/1/21 – 4/1/22
iii. Task/Activity Lead(s): Project Manager with QEP and Berkshire Brownfields Committee
<p>iv. Output(s):</p> <ul style="list-style-type: none"> GIS map of potential sites.
Task 3: Site Assessments
<p>i. Project Implementation</p> <p>Assessment work will be completed in accordance with standards established by the American Society for Testing Materials (ASTM) standard E 1527-13 as well as the EPA’s “All Appropriate Inquiry” rule. The City of Pittsfield anticipates acquiring the four priority sites in the Target Area through tax title; therefore, a Phase I ESA at these sites would not be required but may be desired based on developer interest. Therefore, Phase I ESAs will be conducted at 2 to 6 sites (up to 4 priority sites and up to 2 additional selected sites as warranted through the site identification process). Phase II ESAs will be conducted to refine, confirm or dismiss the presence of contamination in accordance with the ASTM 1903-97(2002) standard. Phase II ESAs will be conducted on 4 to 6 priority sites (4 priority sites and up to 2 additional selected sites as warranted through the site identification process). Remedial Action and Reuse Plans will be developed for 3 to 4 priority sites. Most of the costs (\$228,066) are slated for Phase II ESAs, including hazardous building material surveys and groundwater and indoor air quality investigations, which may involve indoor air quality assessments surrounding the 50 East Mill Street site. Quality Assurance Project Plans (QAPPs) and Health and Safety Plans will be prepared as appropriate. The budget for this task is \$260,066.</p>
ii. Anticipated Project Schedule: 12/1/21 – 9/30/24
iii. Task/Activity Lead(s): QEP
<p>iv. Output(s):</p> <ul style="list-style-type: none"> Phase I ESA reports. Approved site-specific QAPP Addendas. Phase II ESA reports documenting the results. Green and sustainable efforts reported in quarterly reporting. Draft remedial action plan(s). Draft ABCA(s) with GSR language.

- Updated ACRES database.

Task 4: Community Outreach & Education**i. Project Implementation**

BRPC will conduct community outreach efforts to residents, neighborhood groups, and others. BRPC will hold ±18 public meetings of the Steering Committee to seek input. BRPC will work with our project partners to disseminate information regarding the status of the program via a variety of media and community outreach venues. These include virtual public meetings, publications in newspapers, newsletters, radio, public access television postings, websites, and social media. The budget for this task is \$10,680.

ii. Anticipated Project Schedule: Project Manager**iii. Task/Activity Lead(s): 11/1/21 – 9/30/24****iv. Output(s):**

- Color brochures and FAQ insert(s).
- Powerpoint Presentation(s) and displays for public meetings.

3.b. Cost Estimates

Budget Categories		Project Tasks (\$)				Total
		Task 1	Task 2	Task 3	Task 4	
Direct Costs	Personnel	\$7,000	\$2,400	\$4,050	\$3,450	\$16,900
	Fringe Benefits	\$4,170	\$1,430	\$2,413	\$2,055	\$10,068
	Travel	\$2,000				\$2,000
	Equipment					
	Supplies	\$1,094				\$1,094
	Contractual		\$3,600	\$250,346	\$2,400	\$256,346
	Other (include subawards)					
Total Direct Costs		\$14,264	\$7,430	\$256,809	\$7,905	\$286,408
Indirect Costs		\$5,630	\$1,930	\$3,257	\$2,775	\$13,592
Total Budget (Total Direct Costs + Indirect Costs + Cost Share)		\$19,894	\$9,360	\$260,066	\$10,680	\$300,000

3.c. Measuring Environmental Results

BRPC will track, measure and evaluate our progress in achieving project outcomes, outputs and project results. BRPC will develop a Workplan for approval by EPA Region 1 that will include anticipated outputs and outcomes. This information will be tracked in quarterly and final reports. BRPC will use ACRES to report, document, and track information such as funding received, contamination present, acres cleaned up, acres redeveloped and funds leveraged.

4. Programmatic Capability and Past Performance**4.a. Programmatic Capability****4.a.i. Organizational Structure & 4.a.ii. Description of Key Staff**

BRPC has continually operated at a “low-risk” term under agency OMB Circular A-102 regulations. An annual audit of its financial records is conducted by an independent certified public

accountant whose responsibility is to evaluate and certify all contract activities. BRPC's management procedures have been determined to be in compliance for such audits. There have been no adverse audit findings from OMB Circular A-133, nor from audits conducted by federal, state, or local government inspector generals or similar organizations, nor audits conducted by the U.S. General Accounting Office. EPA conducted limited scope reviews in FY09 and FY14, where no findings were issued.

BRPC's staff has nearly 49 years of experience in managing a variety of grant programs, and has previously received six EPA Brownfields Assessment Grants for petroleum and hazardous assessments. BRPC has also established a Revolving Loan Fund through grant funding from EPA. BRPC has dedicated and experienced staff responsible for meeting the various requirements of state and federal agencies. In FY19, BRPC was contracted to manage approximately \$6M in state and federal funds. BRPC is committed to retaining project leadership and to successfully completing projects.

Melissa Provencher, Environmental & Energy Program Manager, is BRPC's Brownfields Program Coordinator, which is her primary job responsibility. Ms. Provencher has been with BRPC for over 21 years. She closed out successful Assessment Grants from 2005, 2007, and 2013 along with an ARRA-funded coalition assessment grant, and is currently closing out BRPC's 2017 Assessment Grant. Ms. Provencher closed Cleanup Grants for the Towns of Lee and Dalton and completed the Lee Area-Wide Planning Grant. Ms. Provencher is currently managing the Brownfields RLF and providing grant management services to the Towns of Adams, Great Barrington and Lee and the City of North Adams for 2016 and 2017 Assessment Grants, as well as a 2018 Cleanup Grant to the Town of Adams.

4.a.iii. Acquiring Additional Resources

BRPC, with input from the Steering Committee, will hire a QEP to conduct Phase I and II ESAs and Remedial Action and Reuse Plans. BRPC has successfully contracted with QEPs in the past for similar projects and follows all state and federal procurement laws and regulations.

4.b. Past Performance and Accomplishments

4.b.i. Currently or Has Ever Received EPA Brownfields Grants

(1) Accomplishments

BRPC's success is measured by EPA grant funds that have led to site cleanups, created jobs, reduced environmental risk and improved the region's quality of life. BRPC has completed 27 Phase I ESAs, 21 Phase II ESAs and 8 Remedial Action and Reuse Plans. Clean-up or redevelopment projects are completed or underway on seven of these sites as a result.

(2) Compliance with Grant Requirements

BRPC, in conjunction with its environmental consultant, has consistently provided EPA with both mandatory and voluntary reporting measures, including property profile forms, ACRES reporting, quarterly reports, financial status reports and MBE/WBE forms. BRPC's QEP has provided EPA with QAPP reports and updates or modifications as required. BRPC has a solid track record for appropriately and timely closing-out of grant projects.

THRESHOLD CRITERIA FOR ASSESSMENT GRANTS

1. Applicant Eligibility

The Berkshire Regional Planning Commission (BRPC) meets the eligibility requirements since it was established by state legislature as a governmental entity in 1966 under Chapter 40B of the Massachusetts General Laws (please see attached). The purpose of this chapter is to permit a city or town to plan jointly with other cities or towns to promote with the greatest efficiency and economy the coordinated and orderly development of the areas within their jurisdictions and the general welfare and prosperity of their citizens. The Commission is comprised of elected and appointed community officials from each of its 32 member communities as well as a full-time professional staff.

2. Community Involvement

Public outreach and communication is essential to the success of this project and the larger Berkshire Brownfields Program. The Community Involvement Plan includes working with the Brownfields Steering Committee and our project partners: 1Berkshire, the Pittsfield Housing Authority (PHA), and the Berkshire Environmental Action Team (BEAT) to involve the community in the planning and implementation of the project through regular meetings, newsletters, and working directly with stakeholders as needed.

The Brownfields Steering Committee was created in 2004 and is made up of representatives of the towns of Adams, Dalton, Lee, and Great Barrington and the cities of North Adams and Pittsfield, as well as Economic Development Agencies (i.e., 1Berkshire and Lee CDC), BRPC staff and policy board, and our EPA Project Officer. The City of Pittsfield (Target Area) is represented on the Brownfields Steering Committee and will be directly involved in site prioritization, site updates, and site cleanup and reuse planning. BRPC will use a five-step approach that consists of soliciting, collecting, considering, responding to and incorporating community input. BRPC will offer alternatives to in-person community engagement in the event of social distancing or other restrictions due to COVID-19.

BRPC has an excellent track record working with residents, site owners, developers and members of the business community. BRPC staff will be available to work directly with stakeholders as needed. BRPC staff will oversee the work of the QEP; however, when appropriate, site owners and municipal officials will be able to work directly with the QEP. BRPC has also partnered with 1Berkshire to assist in working with property owners. Project progress, next steps, issues and achievements will all be communicated through the BRPC website and newsletter as well as through local newspapers. BRPC staff will be available to answer questions or address concerns and site factsheets will be created to summarize actions, findings, progress and next steps.

3. Expenditure of Assessment Grant Funds

BRPC has completed the FY17 Assessment Grant and the grant period closed on 9/30/20. The grant is in the process of being closed and will be closed out by 12/28/20. Please see the attached copy of the financial record displaying the amount of cooperative agreement funds drawn down as of 10/1/20 in the form of a report from the Automated Standard Proposal for Payments (ASAP).

CHAPTER 40B

REGIONAL PLANNING LAW

C. 40B Sec. 1. Title.

This chapter shall be designated and may be known as "The regional planning law."

C. 40B Sec. 2. Purpose.

The purpose of this chapter is to permit a city or town to plan jointly with cities or towns to promote with the greatest efficiency and economy the coordinated and orderly development of the areas within their jurisdictions and the general welfare and prosperity of their citizens.

C. 40B Sec. 2A. Consent to Inclusion in Region or District.

No state agency shall place a city or town individually or severally, within a regional or district grouping without the consent of the governing body of such city or town. The governing body in a town shall be the town meeting and in a city, the city council.

C. 40B Sec. 3. Planning Districts.

Any group of cities, towns, or cities and towns may, by vote of their respective city councils or town meetings, vote to become members of and thus establish a planning district, which shall constitute a public body corporate. After a planning district has been thus established, any other city or town within the district area as hereinafter defined may by vote of its city council or town meeting apply for admission. Upon the affirmative vote of two thirds of the representatives of the cities and towns comprising the district, said city or town shall become a member thereof. The area of jurisdiction of said district shall be an area defined or redefined as an effective regional planning region by the Massachusetts office of business development. All rights, privileges and obligations applicable to the original members of the district shall be applicable to the new members.

C. 40B Sec. 4. District Planning Commissions.

In each planning district so established there shall be a district planning commission consisting of one member of the planning board of each city and town voting to join such district, elected annually by said planning board and certified in writing to the district planning commission. Said member may be replaced by a two thirds vote of his planning board before the termination of his annual appointment. In the case of the planning board's failure to elect a delegate in any year the previously named delegate shall continue to serve until his successor is qualified, as long as he shall remain a member of his local planning board. There may be an alternate designee, who may or may not be a planning board member, who shall be a resident of the city or town he represents, appointed annually and certified in writing to the district planning commission by the mayor in a city, confirmed by the council, or in the case of a city with a plan E form of government, appointed annually by the city manager, or in a town by the selectmen or in towns with a manager form of government, by the town manager, who may attend meetings of the district planning commission and who shall assume the rights and duties of the planning board member in his absence. The alternate designee shall be named in writing to the district planning commission annually in order that he may perform the duties and exercise the powers authorized in this section. In a member town which has not established a planning board, the selectmen shall annually appoint a member of the district planning commission. Such district planning commission shall annually elect a chairman, a vice chairman, a treasurer, and a clerk from among its members and alternate designees, and may elect an assistant clerk, from among such members and alternate designees. The treasurer and assistant

treasurer shall give the commission a bond, with a surety company authorized to transact business in the commonwealth as surety, for the faithful performance of their duties in such sums and upon such conditions as the commission may require. The said commission may employ experts and clerical and other assistants. All meetings of the commission shall be held at the call of the chairman and at such other times as the commission may determine. A quorum of the commission shall consist of at least one fourth of the duly named members or alternate designees. Lack of a quorum shall not prevent the members at an officially called meeting from coming to order, making motions, discussing or passing a motion to continue said meeting to a later time. The commission shall establish rules of procedure for its activities and shall keep a record of its meetings, transactions, resolutions, findings and determinations, all of which shall be public records.

C. 40B Sec. 4A. Executive Committee of District Planning Commissions; Membership; Powers and Duties.

Upon a two-thirds vote of all of the members of the district planning commission there may be established an executive committee, elected annually from the membership of the commission, and consisting of the chairman, vice chairman, if one is elected annually by the commission, the clerk, the assistant clerk, if one is elected annually, the treasurer and at least one but no more than seven members elected at large from the commission membership annually, so that there shall be an uneven number of members of said committee. Actions taken by said executive committee shall be in the name of and on behalf of the commission. Such actions may include one or more of the following listed functions, but only if authorized by a two-thirds vote of the commission's total membership:-- employment of technical staff members, and other professional and clerical assistants; retention of consultants; the disbursement of commission funds based upon a warrant approved by a majority of the executive committee; the borrowing of funds in anticipation of receipt of revenue; applications for federal, state and local aid; the preparation of reviews and comments on proposals of a regional or intercommunity nature, including those referred to the district planning commission under the provisions of Section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, Title IV of the Inter-Governmental Cooperation Act of 1968, and Section 102 of the National Environmental Policy Act of 1969; proposed zoning changes near municipal boundaries of member cities and towns; requests for planning related advice; and the establishment of various technical advisory committees. Said executive committee shall report its actions to the full commission at least quarterly, and its authority to exercise such functions heretofore authorized shall be reconfirmed by a two-thirds vote of all of the members annually. Additional functions may be authorized for the executive committee from time to time. Such additions shall also be by a two-thirds vote of the district planning commission membership. The authority given to the executive committee to act on behalf of the commission may be terminated for any function by a majority vote of the commission members and thirty days' notice to said executive committee.

C. 40B Sec. 4B. Seal.

Each planning district may have a seal consisting of a circular die bearing the words "Commonwealth of Massachusetts, --- Regional Planning District, 19-", which seal may be used whenever deemed advisable by the district planning commission on papers and documents issued or executed by the commission or by any officer or employee designated by the commission.

C. 40B Sec. 4C. District Planning Commissions; Membership of Commanding Officers of Certain Military Installations.

Whenever there is located, wholly or partially, within a planning district established hereunder, a federal military installation having a resident population of at least five hundred persons according to the most recent available federal decennial census, the district planning commission may vote to offer to the commanding officer of said federal military installation the privilege of membership for himself or his designee. Upon acceptance by the commanding officer of this offer, he shall be deemed a member ex officio of the district planning commission, and shall assume the same rights and duties as other commission members, except that this ex officio membership shall not continue except by an annual affirmative vote of the majority of the commission.

C. 40B Sec. 5. District Planning Commissions; Powers and Duties; Regional and District Plans.

A planning commission established hereunder shall make careful studies of the resources, problems, possibilities and needs of its district and, on the basis of such studies, shall prepare a comprehensive plan of development or a schematic study plan of such district or of such part or parts thereof as the commission may deem necessary and in such plans shall make such recommendations for the physical, social, governmental or economic improvement of the district as in their opinion will be in the best interest of the inhabitants of the district. Such plans and recommendations shall concern, among other things, the general use of the district, including land use, principal highways and expressways, bridges, airports, public utilities, public facilities, parks, recreational areas, public institutions and such other matters as in the opinion of said commission will be beneficial to the district and will promote with the greatest efficiency and economy the coordinated development of the district and the general welfare and prosperity of its people. Before the adoption of any such regional plan or a portion thereof, the district planning commission shall hold at least one public hearing thereon, notice of the time, place and subject of which shall be given. Written notice of such hearing shall be given to each planning board, board of selectmen, and city council. Notice of the time, place and subject of the hearing shall be published at least once in a newspaper having substantial circulation in the region at least ten days before such hearing. Adoption of such plan or portion thereof shall be by a majority vote of the representatives of the district planning commission. Such plan may be amended from time to time in the same manner as hereinbefore provided. A copy of the plan adopted by the commission or any amendments thereto signed by the chairman shall be filed with the town clerk of each member municipality not more than thirty days after commission action. Such plan or portion of a plan shall be a public record. Such district planning commission shall also assist the planning boards of the several cities and towns within the area of its jurisdiction in applying any district plans and recommendations so adopted to the local board's area of jurisdiction.

Such planning commission shall report annually to the city councils and town meetings of the cities and towns within its district, showing the status of its plans and recommendations. Such plans and recommendations shall be advisory only.

C. 40B Sec. 5A. Agreements for Conducting Water Favorability Studies.

Such commission may enter into an agreement with the water resources commission for the purpose of conducting water favorability studies under the direction of the water resources commission, as authorized by section nine of chapter twenty-one. The district's share of the cost of such studies shall be assessed against the constituent cities and towns in accordance with the provisions of section seven of this chapter.

C. 40B Sec. 5B. Economic Development Regional Commissions.

A district planning commission may, by an affirmative vote of two thirds of the representatives of the cities and towns comprising the district, agree to act as, and to assume the duties, obligations, and responsibilities of, an economic development regional commission for as many of the cities and towns within its area of jurisdiction as it may deem proper and logical, subject to the availability of funds for such purpose; provided, however, that said cities and towns shall be eligible for designation as an economic development region, hereinafter called the region, in accordance with the provisions of the Public Works and Economic Development Act of 1965. Additional eligible cities and towns may be added to or deleted from the region by an affirmative vote of two thirds of the representatives of the cities and towns comprising the district.

The district planning commission members and alternate designees of the cities and towns comprising the region shall constitute the economic development regional commission. In addition, such technical and advisory committees as are necessary and required by the Public Works and Economic Development Act of 1965 may be appointed in accordance with the provisions of said Act for the purpose of providing advice and guidance to the region.

The economic development regional commission may prepare economic development programs which shall be public records and may be changed or supplemented from time to time by a majority vote of the representatives of the cities and towns comprising the region. Said regional commission may conduct feasibility and implementation studies for public facilities and programs and develop public and private development projects which are consistent with and which aid in implementing the objectives of said commission. Said regional commission may advertise and otherwise promote the implementation of its plans and recommendations for the economic and industrial development of the region and may sponsor conferences, institutes, seminars and training programs on behalf of the region.

C. 40B Sec. 6. Consultations with, and Assistance to, Commissions by Commonwealth Agencies.

The several officers, boards, commissions, departments and divisions of the commonwealth and city and town officials may consult with any such district planning commission and shall furnish or make available to it on request all data and information within their knowledge and control pertaining to the area of jurisdiction of such commission.

C. 40B Sec. 7. Annual Estimate of Costs and Expenses of Districts; Payments to District Treasurer; Grants and Gifts; Contracts for Planning Studies and Services.

Said commission shall, annually in the month of February, estimate the amount of money required to pay the costs and expenses of the district for the following fiscal year, shall fix and determine the proportion of such costs and expenses to be paid by the constituent cities and towns thereof during such fiscal year which, however, shall not exceed any per capita limit established by the vote of two-thirds of the city councils and town meetings of member cities and towns, and shall certify the amount so determined for each city and town to the assessors thereof who shall include the sum in the tax levy of such fiscal year, provided that the per capita limit of any new member municipality shall not be less than the per capita cost to the member municipalities in the district at the time the new member joined the district. Such apportioned cost shall be on a per capita basis in direct proportion to the population of the city or town and the planning district as they appear in the most recent national census, exclusive of the inmates of county, state or federal institutions, and exclusive of the resident population of federal military installations to which the privilege of ex officio membership has been extended as provided in section four C; provided, however, that the national census or the annual national census estimate, whichever is the most recent, shall be used in any planning district in which the governing body of each city and town comprising such planning district accepts the provisions of this proviso. Upon order of the commission, the treasurer of each constituent municipality thereof shall, from time to time, subject to the provisions of section fifty-two and section fifty-six of chapter forty-one, pay to the district treasurer sums not exceeding the amount certified by the commission as the city's or town's share of the costs and expenses of the district. The commission is authorized to determine the amount of payment to be made to the district during the first year of membership of a new city or town in its respective district, but such payment shall not exceed any aforementioned per capita limits. Any such district planning commission established under the authority of this chapter is authorized to receive for its own uses and purposes any funds or moneys from any source, including grants, bequests, gifts or contributions made by the federal, state or municipal governments or by any individual, corporation or association. Any such district planning commission may contract with the federal or state government, or a city or town within such district, or with another district planning commission or planning council for the performance of planning studies and services within the limits of funds available to the district planning commission for such purposes. The treasurer of the district planning commission or, in his absence, the assistant treasurer shall disburse the moneys so received upon an order approved by the chairman of the commission when so authorized by a majority vote of said commission.

C. 40B Sec. 8. Borrowing in Anticipation of Revenues; Execution, Effect, and Maturity of Revenue Anticipation Notes.

The district may authorize debt by a majority vote of the commission in anticipation of revenue to an amount not in excess of that to be received during the current fiscal year from member cities and towns. Notes issued under authority of this section shall be in the name of and upon the full faith and credit of the district, and said notes shall be signed by the treasurer of the district, and the chairman of the district planning commission shall countersign and approve them in the presence of the clerk of the district who shall certify to the fact on the face thereof. Such notes shall be payable, and shall be paid not later than one year from their dates, and shall not be renewed or paid by the issue of new notes, except as provided in section seventeen of chapter forty-four.
